The CONACYT - UT Arlington Program

This program was established in Fall 2005 to promote and strengthen technical cooperation between CONACYT and UT Arlington through the encouragement and support of Mexican graduate students admitted to doctoral programs in Science and Engineering at UT Arlington. As part of this program UT Arlington commits to sponsor a cohort of a maximum of 5 new doctoral students a year and both CONACYT and UT Arlington will provide scholarship and cost-sharing benefits to students that matriculate and remain registered and in good academic standing.

Doctoral Science & Engineering Programs

Our University offers doctoral programs in 17 Science & Engineering fields, each with unique opportunities and areas of specialization:

- Aerospace Engineering
- Applied Chemistry
- Applied Physics
- Biomedical Engineering
- Chemistry
- Civil Engineering
- Computer Science Engineering
- Computer Science
- Electrical Engineering
- Environmental & Earth Sciences
- Experimental Psychology
- Industrial Engineering
- Materials Science & Engineering
- Mathematical Sciences, with concentrations in
  - Geology
  - Physics
  - Psychology
- Mathematics
- Mechanical Engineering
- Quantitative Biology

Scholarship and Cost-Sharing Benefits

- The CONACYT – University of Texas Arlington Graduate Fellowships, which allow the benefit of resident tuition, will support Mexican students who are admitted and matriculate as PhD students in these programs.

- UT Arlington will cover the cost of tuition and fees for the first two academic years; CONACYT will pay the tuition and fees for the remainder of the doctoral program, beginning with the third year.

- According to CONACYT’s established norms, CONACYT will pay a stipend for the students first two academic years in the program.

- UT Arlington will guarantee supplemental support of US $800 during the first two years to bring the total stipend award provided by CONACYT to US $12,800 each year. UT Arlington will pay a stipend for the remainder of the doctoral program, beginning with the third year. If required by the students program of study and subject to all applicable laws (including the requirements to retain the students' authorization to study in United States) and UT Arlington policies, UT Arlington will provide these students with teaching or research assistant positions that will include a stipend.

- According to CONACYT’s established norms, CONACYT will provide support for health insurance for the students entire academic program.

The Application and Enrollment Process

- Apply for admission. Submit to the Graduate School the application, application fee and supporting application documents for the Science, Engineering or Interdisciplinary Science doctoral program in which admission is desired. [http://grad.uta.edu/prospective/apply](http://grad.uta.edu/prospective/apply)

- Apply for the CONACYT Fellowship

- Receive approval of unconditional acceptance to the graduate program to which you applied.

- Contact CONACYT. Send them your unconditional acceptance letter.

- Submit your CONACYT fellowship award letter to the Graduate School.

- Issuance of your immigration documents by the Graduate School.

- Obtain the necessary visa and authorization to enter the United States to study.

- Enroll as a full-time doctoral student. Full time is defined as 9 semester credit hours per semester.

Oppurtunities for International Students

- 17 Doctoral Degrees in the Sciences and Engineering

- 260 Student Organizations

- Over 3.2 million titles available in 6 campus libraries, with access to thousands of professional and technical journals in print and online

- Extensive research facilities for all the sciences and engineering departments

- 10 computer labs, many open 24 hours a day, 7 days a week

- Easy access to sporting and cultural events

- Short distance to DFW International Airport, a major communications and traffic hub for all of North America and the world
